DETAILED ACTION

Drawings

1. The drawing is objected to for the following reason:

Figure 2 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.121(d)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the down converter, first converter, second converter and the comparator as recited in claim 10 must be shown or the features canceled from the claim. No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended."

If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Objections

3. Claims 1-21 are objected to because of informalities; appropriate correction is required.

In claim 1, lines 3,5,7,9 and claim 2, line 2 "said baseband complex samples" should be "said sequence of baseband complex samples";

In claim 3, line 2 "said codewords" should be "said sequence of codewords";

In claim 6, line 3 change "the composite decoded codeword phrase error" to "a composite decoded codeword phrase error".

In claim 6, line 4, specify "reference".

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 1-9 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-9, respectively, of U.S. Patent No. 6,781,447. Present claims 1-9 are broader in scope than claims 1-9 in patent '447. All the limitations in claims 1-9 in patent '447 can read on the claims 1-9 of this instant application.

5. Claims 10-11, 14-15, 18-19 provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 18-19, 23-24, 27-28, respectively, of copending Application No. 10/004,581.

Although the conflicting claims are not identical, present claims are broader in scope than claims in patent '447. All the limitations in claims 10-11, 14-15, 18-19 in patent

Art Unit: 2634

'447 can respectively read on the claims 18-19, 23-24, 27-28 of this instant application.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Claim Rejections - 35 USC § 102

6. Claims 20 and 21 rejected under 35 U.S.C. 102(e) as being anticipated by Gregory Caso in U.S. Patent 6,236,687, admitted prior art in application.

Regarding claim 20, Caso discloses in '687 a communication receiver (Fig. 3) comprising a converter (317), a PLL (317, 318, 319, 316) comprising a block decoder (318) and estimates a phase error (output of the digital filter 316).

Regarding claim 21, all limitations of BPSK, QPSK, biorthogonal binary block codes and decoding rate are disclosed in '687 (column 3, lines 62-67, column 4, lines 1-36).

Allowable Subject Matter

7. Claims 12, 13, 16, 17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
